NO CESSION

OF FIERCE FIGHTING YESTERDAY.

Reports that the Japs are North of Mukden.—Appalling Stories of the Losses

Bulletin Special,

London, March 7.—There was no cessation of fighting between the Russian and Japanese armies in Manchuria yesterday. Russian reports state that at a distance the tide of battle in the immediate vicinity of Mukden seemed to be ebbing away. The most that war critics at St. Petersburg seem to hope for at present is that Gen. Kuropatkin has re-established his line of retreat in the direction of Harbin. Word has reached New Chwang that the Japanese are already north of Mukden with a large force and that the Russians are facing a disastrous defeat. There appears to be a possibility that Gen. Kuropatkin's officers personally are in command of the Russian forces in the triangle between the right and the Hun River, which vital position the Japanese have been assaulting for days.

Russian reports admit that 12,000 men have been wounded, but make no mention of the killed and at the same time assert that the Japanese have lost 30,000 in killed and wounded.

Edmonton Delegates in Winnipeg.
Bulletin Special,

Winnipeg, March 7.—Mayor MacKenzie and S. C. Paton arrived here yesterday afternoon from the east. They said they were assured Edmonton would be the capital of Alberta, and were pleased with their reception in Ottawa. They gave interesting interviews in Winnipeg on Edmonton and its advantages of municipal ownership systems. Discussing separate schools, they said that it was unanimously felt that the question should be left for the new provinces to decide for themselves.

TRIAL CONTINUED.

REX vs. KING IN SUPREME COURT.

Kisaynis testifies to having heard the report of a gun in the direction of the Camp.

MONDAY

Dr. Wilson who was on the witness stand last week was recalled and asked to make the comparison between a human skull which was shown him and those of a bear and wolf, especially in reference to the parietal bone. This he did declaring there was scarcely any resemblance between them, the sutures and convexity of a human skull being entirely different from those of the bear and wolf. In the cross-examination Mr. Biggar requested Dr. Wilson to fit the pieces of bone found in the ashes of King's old camp fire to the same portion of the skull, from which they were supposed to come, and denote the similarity. This was done with the result that the pieces lacked about an inch from their sutures coinciding with those of the skull in evidence. Dr. Wilson also would not deny, but that there were considerable differences between these same bones and the human skull he had in evidence.

Mr. Anthony Martin a taxidermist residing in Edmonton was next called and identified two skulls before spoken of as those of a brown bear and a large timber wolf. The same being taken from the animals by himself and yesterday given to Sergeant Anderson.

Court adjourned until two o'clock this afternoon.

TRIED TO SELL THE OUTFIT

When court resumed after lunch, Andrew Cunningham was the first witness called. He was once a member of the Legislative Assembly of the Territories, but now resides at Lesser Slave Lake. During the fall witness had been with Sergeant Anderson.

THE TERRITORIAL SCHOOL SYSTEM

The Winnipeg Free Press reviews the development of the Territorial school system as follows:-

In the new provinces of Alberta and Saskatchewan the public educational system will be simply the system now in operation in the Territories. There has been no objection raised in the Territories against the continuance of that system when the Territorial status ceases and the Provincial status takes its place; nor has there been any plea for the establishment of a different system. In fact, school agitation is conspicuous in the Territories by its absence. The existing system has proved so satisfactory and successful that the people of the Territories regard it as a model system. Its continuance finds conclusive justification in the success which has attended its workings, the remarkable progress which has been made under it, and the manner in which it has established itself in public acceptance.

The school system of the Territories was first established by ordinance of the Northwest council in 1884. The Northwest Territories Act passed by the Dominion Parliament in 1875 having made provision for the creation of minority schools such schools have from the first existed in the Territories, and exist to-day. The number of such schools and their rate of increase during the six years from 1898 to 1903—the year 1903 being the last for which the statistics are to hand—makes an instructive showing:

	Public school Districts.	Minority school Districts.
1888	509	14
1889	561	14
1900	611	15
1901	690	16
1902	856	16
1903	1,022	16

The number of public schools has thus more than doubled in six years and the number of minority schools has increased only from 14 to 16. Of these 16, 14 are Roman Catholic schools. The salient point of the system is that the majority schools in the Territories is not the separate school as it is known in Ontario. Since 1893 minority schools in the Territories are subject to the same general control and direction as the public schools.

The ordinance of 1884, mentioned above, was followed by several modifying ordinances down to that of 1892, which created a Council of Public Instruction, bringing with it Government responsibility and initiative, in place of the old Board of Education, which had consisted of a Protestant section and a Roman Catholic section. The control and management of the whole school system were thus taken out of the hands of an appointed body and vested practically in the Cabinet directly responsible to the assembly and the people. In 1891 a further change was made, a Department of Education being created, presided over by a member of the Government with the title of Commissioner of Education. To return, however, to the ordinance of 1892. The provisions of this ordinance and its enforcement gave rise to discussions and conferences and an appeal to Ottawa for its disallowance. The Committee of the Privy Council (Sir John Thompson then being Minister of Justice) reported against the granting of the appeal for disallowance and suggested that the Northwest Government and Assembly should review the whole matter carefully and acted upon the Assembly referring the entire question to the Standing Select Committee before which only Father Leduc and Mr. Forget appeared and fully stated their case in support of the appeal that had been made to Ottawa. The Committee prepared and submitted to the Assembly a report which was adopted by a practically unanimous vote, only three members voting in the negative. The Assembly by that vote resolved to change the system of inspection which had been established under the ordinance of 1892, to do away with the uniformity of textbooks, or to make any other changes, except that it recommended that

permission be granted to open the schools with recital of the Lord's Prayer. Save for the publication in 1895 of a pamphlet by Father Leduc entitled "Hostility Unmasked," this practically ended any school agitation there had been in the Territories.

By an ordinance passed in 1885 both the public schools and the minority schools became entitled to a legislative grant from the Territorial school fund, and to a special rate levied upon each school district by its own duly elected trustees for any additional sum needed for the conduct of the school. Payment of the legislative grant was based upon certificates of teachers, attendance of pupils, reports of inspectors and examination passed by pupils. There have been changes from time to time since 1885 in the conditions under which the legislative grant is payable, but in no case has there been made, or is there now, any

BULLETIN CO. Ltd.

Our city has good water but good water can be made better, and Ross Bros. Ltd. have the thing to do it with. Have you seen their "Noxall Filter." It is the simplest Filter on the market, the most thorough and by a long ways the cheapest. Any family can afford one and they are made either for pressure to attach to your city water tap or gravity to filter from a pail or crock.

Following is one of the many testimonials that speak of the work done by these Filters:

The Duquesne Chemical Laboratory, Analytical Chemists and Chemical Engineers, Standard Bldg., 531 Wood St. Pittsburg, Pa., April 12, 1897.

GENTLEMEN:—Following is the report on the samples of water taken from the regular city supply, and also after it had passed through the Tripoli filter. Two filters were tested in this manner one having just been started and the other having been in use four months. The chemical analysis, made to show animal and vegetable pollution, includes the amount of ammonia, albuminoid ammonia and oxygen required to completely destroy such pollution. The bacteriological analysis is a count of the total number of living microbes in ten ordinary drops of water. This test was repeated in duplicate in case of the filtered samples. The results obtained on analysis as follows:

Water from hydrant. From old filter. From new filter.
Ammonia 0.03 0.02 0.02
Albuminoid Ammonia 0.20 0.09 0.08
Oxygen Consumed 1.64 0.56 0.64

The figures represent parts of the impurities in one million parts of water. On cultivation, the hydrant water showed 800 bacteria in ten drops. That from the old filter 0.2 and 4 in three tests, and from the new filter 3, 3 and 7. The above shows that the number of living microbes present has been reduced 99.6 per cent.; the ammonia is reduced 39 per cent.; the albuminoid ammonia 57 per cent., and the oxygen consumed 64 per cent. by passing through the filter, making the originally very bad water equal in cleanliness and purity to the best spring water. These results cannot be surpassed by any system of filtration with which we are familiar.

Respectfully submitted,

W. E. GARRIGUES CHIEF CHEMIST AND MANAGER.
99.6 per cent. of living microbes eliminated by use of the filter.—The price is from \$3.00 up, the \$3.00 one fits on to any house tap and can be removed in two seconds. They are stone Filters and the stones can be cleaned as easily as any glass tumbler or delf cup. The Gravity filters are only \$4.50 and readily filter water from a pail into any other vessel placed to receive the filtered water. They are small and can be easily picked in a very small space to carry from place to place.

The above is correct cut of the Gravity Filter, showing it in operation.

These Filters can only be had in Alberta from ROSS BROS., who are Sole Agents. The Trade supplied.

ROSS BROTHERS, Limited.

THE TERRITORIAL SCHOOL SYSTEM.

Continued from page two.

distinction between public and minority schools in respect of such payments.

A minority school district can only be formed within the bounds of a public school district. If the minority in the public school district are not sufficiently numerous to furnish the support necessary for a separate school, they must needs content themselves with the public school. If they can support a minority school, and desire one they have to petition for it and establish their ability to maintain it.

Between the work done in the public schools and in the minority schools up to half-past three o'clock each day there is no difference. The course of studies is uniform. The text-books are uniform, with the exception of the First and Second Readers, inspection is common and uniform. Departmental examinations are uniform. The teachers undergo annual academic and professional training. In the high schools and normal schools are found Protestants and Roman Catholics, including members of sisterhoods, working together without distinction of creed or class. The provisions or religious instructions in the schools between half-past three and four are uniform, and give entire freedom to each school board. The same is to be said of the provisions in regard to the teaching in any other vernacular language than English. If the board in any district decides, upon the request of the parents, that there shall be such instructions, it must be altered three o'clock on such days as the board determines, it must be confined to reading, composition and grammar, the books used must be the ones authorized by the Commissioner of Education; the instructions must not supersede the instructions in English required by the regulations, and the board is empowered to levy a special rate upon the parents of such children as are given such instruction to pay the necessary expenses in connection therewith.

The school system in the Territories has proved itself under the test of operation to be excellently fitted to meet the actual conditions as they exist in the Territories. By the testimony of those who are conversant with its workings, there has been a steady improvement in the course of studies, in the qualifications of teachers, and in the character of inspection—in regard to all or which it may be repeated, there is complete uniformity. The legislation of 1892 gave centralized Government control, which is one of the best features of the system. Compulsory school libraries, teachers' institutes and reading classes, manual training schools, and methods of distributing school grants which for equitableness and the effective securing of the best results are not surpassed in any Province of the Dominion or other features of the system, which give the people of the Territories just ground for regarding it with satisfaction as they do.

ALBERTA COLLEGE LITERARY.
(Contributed)

Friday evening's Literary at the cottage was a complete success. It took the form of a mock trial in which about fifteen of the pupils took part. The supposed crime was that of one student stealing the contents of a box of catables from another who had just received them from his mother. Claude Ritson laid the complaints. Mrs. T. J. McLeod was lawyer for the defense, while Mr. Fletcher was the lawyer for the plaintiff. Mr. Fisher acted as judge and Mr. Wray as clerk of the court. Four police were present to keep order. Claude Ritson was called to the box and told in a very pathetic manner how his mother had sent him so many nice things from home; how he had eagerly awaited them and on the evening previous to their arrival had taken Mr. Niddrie to the station to help carry them up; how he had opened up the box and found to his delight such a supply of cakes, candies, canned goods, boots, shoes and moccasins. His story of how he looked and felt when he first realized the goods had disappeared quite brought the jury to tears.

Next Mr. Niddrie was called and, although some had difficulty to see this small man over the box, yet he gave considerable valuable evidence.

Mr. Tough, the expert photographer, came next and told how he had seen some individuals going over a fan-light on a certain evening and had taken a snap-shot. He produced the photo in court, but the feet in the fan light were so large the man could

not be seen, consequently the photo gave no direct evidence.

Then the detective was called upon and produced goods found in the prisoner's room, wrapped up in his accused's night-dress, and placed under his, the prisoner's, pillow.

Then Miss Lundy was called upon for the defense and assisted the prisoner admirably. The only peculiarity she had ever noticed about the accused was his extraordinarily big feet. Miss Puffer and Miss Doze both upheld the prisoner's amiability, and together with Miss Nicholls testified to the amosity, generosity and lack of verbosity, of the one charged with the appropriation of Jam.

Then the prisoner's aunt was called upon and between loud sobs told now grieved she was that her nephew was ever accused of stealing jam. It almost broke her heart to think that anyone could consider him, her boy, to be such a thief as to steal a can of decayed plumjam. She noted only one peculiarity about her nephew, and that was his big feet.

Mr. Smith, an expert physician from Toronto, was next called upon and narrated an operation on the prisoner's feet which reduced them from number thirty-three to their present size number twenty-one. He also produced a plan of the former foot and several bones removed in the operation. At present he had the prisoner's feet enclosed in Plaster-of-Paris.

After all the evidence was given the judge gave a good summary of the case and the jury retired but soon returned giving the verdict of not guilty and the prisoner was discharged.

TRIAL CONTINUED.

Continued from page one

son at a deserted camp fire near the Lake when Anderson, searching in the ashes found what they took to be a piece of bone. This Sgt. Anderson had met with three other pieces at Moose's house, when the four seemed to correspond. He identified one of the pieces in court as that found when he was present.

Witness had seen the prisoner at Willow Point crossing, Lesser Slave Lake. On that occasion witness was in a canoe on the lake and the prisoner and a man named Giroux were on the south bank. They beckoned the witness ashore and he interpreted for them as they could not understand each other. The prisoner wanted Giroux to take him across the lake and said he had no money but would pay him in sugar. The prisoner also asked the witness to buy his outfit. Witness had replied that he had no money, but suggested that Bradin and Cornwall or the Hudson Bay Co. might buy it. The prisoner told him he had come from Edmonton to trap in the Peace River country but had changed his mind and wanted to sell our and return.

He again saw the prisoner on the west side of the lake and had sold him some fish.

The next time he saw the prisoner he offered to trade a dog which he had for two fish. Witness asked him why he wanted to sell the dog. The prisoner replied it would not follow him, as he had got it from A. McLean.

It was not the dog produced in court and claimed to have formerly been the property of Hayward.

Cross-examined, witness said it was about daylight when he had first seen the prisoner, who wanted \$300 for his outfit.

He said a flood of the Sucker Creek had at one time submerged the low ground around the camping ground but had not covered the spot where the fire had been.

HELPED MISSING MAN LOOK FOR HORSES.

John Felix Cardinal was called and said he lived on the Sucker Creek Reserve. He recognized the photo of Hayward as that of a man whom he had met on horseback last fall looking for horses. Witness went with the stranger to his father's house. The man had spread out a sheet of paper (possibly a map or plan) but as no-one could understand it had again folded it up and got witness and his brother Adam to assist hunting the horses. The witness found three horses and helped drive them to the camp when the stranger had given him a dollar bill to divide between himself and his brother. The prisoner was at the camp when they reached it. Witness stayed there some time and had a meal. Had seen a bear trap at the camp which he thought was the same as that in court. Also a coe wif a collar composed of a white metal chain over a strap. He identified the dog and collar produced in court.

Cross-examined, witness said when the man paid him for finding the horses he took the money from a purse and had at least one more bill in the purse. The man appeared pleased to get the horses. Could not say whether he had been angry that morning or not.

IDENTIFIED THE TWO MEN.

Adam Cardinal remembered helping his brother & a stranger hunt for some horses last fall. He picked out Hayward from the photographs and identified the prisoner as the other man he had seen at the camp.

There was a dog at the camp too, which witness identified as the one in court and a gold pan like that one shown him.

Cross-examined, witness said he had never seen a gold pan before, but others had told him about them and from their descriptions he had recognized this as one. Witness denied having sold on the preliminary that he would know the pan again, and having signed his evidence at the previous hearing.

His evidence was in the main corroborative of the testimony of his brother.

BAZILE MISINIGUNAPI

Witness said he lived at Lesser Slave Lake and was a cousin of Edward Misinigunapi. Was once at the camp with Sgt. Anderson who was looking in the ashes. Had previously been at the fire twice. There were two men there each time. The prisoner was one of them. Witness identified Hayward from the photo as the second man. The two visits were made in the second day. Had seen a dog at the camp with a collar and chain. Witness identified those in

court as the ones he had seen.

On his second visit the missing man was repairing a broken gun which was identified as that in court. The prisoner was at that time making bannock in a Dutch oven. A heavy kettle produced by the court was identified as the oven. Witness had a meal with the men. The missing man had asked "Charley" to cook some bacon, which the prisoner had done, and had given it to witness. Noticed a spike in the camp several feet long with an iron spike in the end, was like the spike produced in court.

Saw a heap of traps including a bear trap. Identified the one in court by the recently-shaved stamps and claws. Missing man had told witness he had cost \$10 in Edmonton.

In answer to His Lordship, witness said that on his first visit the fire was only a small one. The second time it was larger, as the prisoner was baking. When he again went again with Sgt. Anderson, the fire place was very much larger.

HEARD A GUN SHOT.

Joseph Kisayip said he lived on the Sucker Creek Reserve. Had seen Fischer at camp fire near trail as he passed along to the lake. The camp was inhabited three days to his knowledge. The third night, while in his traps near the lake, witness heard the sound of a gun on toward midnight. The sound came from the direction of the trail in the rear of Moose's house from the vicinity of the camp. Witness the next evening passed the camping place when he met the prisoner on the trail. Prisoner had four horses, riding one, the other three being packed, and was going toward the settlement by the road along the shore. That evening witness strayed over to the deserted camp. It had snowed some the night before. Witness crawled around the camp looking at things till he came to the trough near the fire. Here he saw the tracks of human feet leading into the water. At another place some distance from this place and close to the bridge on the creek, he found the tracks leaving the water.

The sitting was then adjourned.

TO-DAY.

ENORMOUS CAMP FIRE.

This morning's evidence was commenced with the cross-examination of the witness Joe Kisayip, who merely corroborates the story told in the direct examination and locates the relative position of his house and that of his neighbor to the site of King's

CLOTH IN THE ASHES.

The grandson of Chief Mooseos, an Indian boy about fifteen years old, was next called. He said he saw the prisoner King go past his grandfather's house, where he lived, last fall with four pack horses. He then went down to the camp deserted by King and noticed a very large shoulder, no fire which was mostly a mass of embers. On these embers he saw a form of burned cloth, the ash retaining its shape, also a button, which he picked out of the fire, and that crumbled away in his hands.

CHIEF MOOSTOOS FINDS BLOODY SPECIMENS.

Mooseos (a cow), the chief of the Indians on Sucker Creek Reserve, came on the stand and narrated his connection with the finding of the different clues which later led to the arrest of the prisoner King. "One day last fall," Mooseos said to the interpreter, in answer to questions put to him "I went down on the reserve to a deserted camp, accompanied by Sgt. Anderson and Special Constable McDonald of the N. W. M. P. The first thing I noticed was a clump of grey willows with a sort of nest built upon them, which bent them over, and right underneath this was a big spot covered with the ashes of a recent fire. I had often seen this next before, it having been built several years ago, when we were afraid of a flood, but I never saw the ashes there before. About eight feet from the edge of the ashes was some straw and leaves which had apparently been the bed of a resident of the camp. In kicking this stuff carelessly about I observed a large dark spot in which I picked up some loose pieces and rubbed on a piece of paper. Then I knew that the spot was a large blood stain. We then searched the adjacent brush, where we found many different specimens which Sgt. Anderson took in his possession. These specimens were all enumerated before in Sgt. Anderson's story, some being bits of supposed human anatomy and others small personal articles which are supposed to have belonged to the missing man Hayward. In the cross-examination, the chief's story was not quite as coherent as in the direct, but nothing definite was gained by the defense.

The morning session ended with Chief Mooseos still on the stand.

NO DEVELOPMENT

AS YET IN THE CABINET CRISIS

The Globe Publishes the Amendment said to be Demanded by Mr. Sifton.

Bulletin Special.

Ottawa, March 6th—There was no development in the cabinet crisis. The Globe publishes the statement of the amendment said to be demanded by Mr. Sifton. It continues the present ordinance of the Territories and allows of remedial legislation by the Dominion practically following the terms of the British North America act on education. There are rumors that this will be accepted but there is nothing definite yet. E. W. Thompson, writing for the Buxton Transcript, speaks of Hon. Mr. Fitzgerald as the cause of the difficulty and the bar to its amicable settlement.

A NEW DIVISION

TO BE ESTABLISHED IN THE NORTH

Part of the Force of R.N.W.M.P. to be Sent North Reached the City Last Night.

Bulletin Special.

Twenty-seven members of the R. N. W. M. P. came in from Regina last evening under command of Inspector Richards. The party is the first detachment to reach the city, of a force to be sent North to open up a new police division in Athabasca and McKenzie and to establish communications through the mountains with the Yukon. The force will be over forty strong and will be under command of Supt. Constantine, with Inspectors Richards and West in charge of subdivisions. Supt. Constantine has spent a great many years in the police and was commanding officer in the Yukon before being transferred to Fort Saskatchewan a few years since.

Roadmaking is not usually included among the semi-military duties of the Mounted Police in these days but one of the undertakings of the new force will be the establishment of easy and permanent means of communication between the Northern interior and the Yukon. To do this a trail will have to be made between Ft. St. John on the upper waters of the Peace River across the Rocky Mountains. The works of cutting this road through the timber and constructing bridges and embankments where necessary will devolve on the police.

The opening of this road will place Dawson City and Edmonton in direct connection overland by the longest trails in the world. The distance as the crow flies is something over 1600 miles and by the trail will probably be 2000 miles.

The most important purpose of the new trail, however, will be to facilitate communication between the Yukon and the interior of the Northwest. In this way it will be of considerable service to the police forces in the north. The enterprise has a strategical phase too, as it will abolish the present isolated position of the Yukon and make it possible in the event of war to introduce troops and supplies overland.

The police duties of the new force will consist in establishing headquarters at a suitable place and erecting the necessary buildings, and from this centre detachments will be located throughout the north country as far as Herschell Island in the Arctic Ocean, this post being transferred from the Yukon to the new division. While the limits of the district have not been announced, it is expected "N" division will include everything between Hudson's Bay and the Rocky Mountains north of the present boundary of Alberta. The terms of service for recruits for this work is two years.

OPPOSED TO LUMBER TARIFF.

The following is a copy of a letter sent by the Single Tax Association to Sir Wilfrid Laurier:

The Right Hon. Sir Wilfrid Laurier,
Premier of Canada,
Ottawa,

Sir:—
We understand that a deputation representing the lumber interests of Canada have waited upon your government urging that the duty upon lumber coming into Canada from the United States be increased. We strongly protest against such a course being adopted, and beg to call the attention of your government to the following facts and considerations:

1. The lumbering interests do not represent the people of Canada, for this is a matter where the lumbermen can be benefited only at the expense of the whole community.

2. Lumber being an absolute necessity of life in this country, anything which increases its cost must increase the cost of living here. This is especially true of the Northwest, where, owing to the lumber combine and the natural scarcity of timber, the excessive cost of building material is a serious drawback to the prosperity of the settlers.

3. The benefits of such an increase will not be shared by the manufacturers of lumber or the dealers, but only by the owners of timber limits.

4. It is a notorious fact that so far from the owners of timber limits requiring protection, in many cases they have made immense fortunes out of the rise in value of their limits owing to the growing scarcity of pine. In spite of the large amount paid to the Ontario government for limits and in spite of the amount paid in stampage dues on the timber cut from such limits, the fortunate buyers of the special privileges have grown rich under the present tariff. Not only is this true, but there are many cases on record where after the limit has been cut over for years, it has been sold at an advance on the original price.

5. It is a fundamental principle of Liberalism, that government interference with the right of the citizen to obtain his supplies wherever he finds it most to his advantage, is inexpedient and unjust.

In view of these facts, it should be sufficiently obvious that an increase in the duty would retard the settlement of the Northwest, increase the expense of building generally in the country, and would benefit no one but the owners of timber limits.

Yours respectfully,
SINGLE TAX ASSOCIATION.
Alan C. Thompson, Pres.
Arthur B. Farmer, Sec'y.

MARTINS.

Correspondence.

Hauling lumber from Mr. Lund's sawmill is what most of our farmers are engaged in at present.

The sleighing here, is "pretty tough," the saying goes. A few more of those beautiful star-shaped crystals that we used about in story-books wouldn't come amiss.

While we think of it, there came a Miss to our neighbor's place, Mrs. Nordstrom's and we understand she is quite content to stay for some time.

The new bridge across the Vermilion is the latest boon to the village. We are indeed indebted to the Northwest Government for their generosity in this matter.

The Gabrelhouse boys are doing a rushing business with the Barr company. They have just returned from there and are starting back again with three loads of oats. Oats are worth fifty cents at "McArthur's" camp.

The prospects for a big immigration into Martins are very bright. It is hard to see a good blacksmith could make a fortune here. A flour and feed store might do a flourishing business. Even a good parson might be able to live here. The world certainly would flourish. A Justice of the Peace is wanted. In fact Martins is the centre of attraction at present and if it some day isn't a town of importance, why my name's not.

TEN. NEVIS.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal—Coal lands may be purchased at \$10 per acre for soft and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and stock companies holding free miners' certificates may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five years, upon payment in advance of \$750 per annum for an individual, and from \$30 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days, if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying

with other requirements purchase the land at \$100 per acre.

Permission may be granted by the Minister of the Interior to locate a claim containing gold and minor alluvial copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining—Manitoba and the N.W.T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or beach, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings but extends back to the base of the hill or bank but not exceeding 1,000 feet. Where stream power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent. collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by a position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty as above as placer mining.

Placer Mining in the Yukon Territory—Greek, gulch, river and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days. If the claim is within territories of a mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent. on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase and free miners may work their claims in partnership by filing notices and paying fee of \$2.00. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory

Locality suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be located for twenty years, provided the ground has been prospected by the applicant or his agent; is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent. of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unexpended and for agricultural and building purposes.

Petroleum—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery in an area not exceeding 640 acres including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 per acre, subject to royalty at such rate as may be specified by order-in-council.

Department of Interior, Ottawa, September, 1902.

LOCAL

—Train on time.

—The city council meet tonight.

—Tomorrow is Ash Wednesday.

—Fair to-day and Wednesday and not much change in temperature.

—Arrangements are under way for celebrating St. Patrick's day by the local Irishmen,

—The regular monthly social in connection with St. Joachim's church will not be held this week. It may be held on St. Patrick's night.

—There will be service in All Saints church to-morrow (Ash Wednesday) at 11 a.m. and 8 p.m. Rev. H. G. Gray will conduct the services.

—Rolfe & Kenwood, the real estate brokers, have removed to their new and commodious offices on Jasper avenue, next to Sheriff Robertson's.

—Rev. Geo. W. Kerby, of Calgary, lectures in the Methodist church this evening on "The March of the Twenty Century."

—The Board of Trade at a council meeting yesterday decided to secure the frame building next Gariepy and Lessard's store for the use of the A committee from the board will wait on the city council this evening to suggest joint action for the advancement of the city's interests.

—W. A. D. Lees of Ft. Saskatchewan, returned last evening from Ottawa, where he was in company with Messrs. Sherer and Aspin to assist the Government to assist in the erection of a combined traffic and railway bridge at the Fort and also for a grant of a portion of the police reserve for a station site. Mr. Lees is the last delegate to return, having remained to complete the details of the negotiations with the Government and the railway people. He is well satisfied with the results and considers both matters as finally and satisfactorily settled.

PERSONAL.

Mrs. W. J. Carter will not receive this week.

Geo. H. Webster of Calgary came up last evening.

W. Duffin of Montreal has taken a position with the Edmonton Clothing Co.

D. H. Morris is expected home from the east tonight.

W. A. D. Lees, one of the Fort Saskatchewan delegates to Ottawa, returned last evening.

AGRICULTURAL INSTITUTE
MEETINGS AND LIVESTOCK
JUDGING SCHOOLS

Will be held under the auspices of the Territorial Department of Agriculture and the local agricultural society at the following places:

Strathcona Mar. 18, 8 p.m.
Fort Saskatchewan Mar. 20 & 21.
Edmonton Mar. 22 & 23.
Wetaskiwin Mar. 24 & 25.
Peg. Lake Mar. 7, 2 & 8 p.m.
Lacombe Mar. 28 & 29.

The two day meetings will be Stock Judging Schools at which stock will be used at the morning and afternoon sessions to demonstrate desirable and undesirable conformation. Score cards will be used to teach the value of the different portions of the animal.

The speakers will be:

J. Standish, V.S., Walkerton, Ont.; C. M. McCrae, Ottawa, Ont.

Who will speak on live stock topics using living animals at the stock judging schools, and, if opportunity offers, are prepared to use them at the afternoon sessions of any institute meeting.

All persons interested are respectfully urged to attend. Young men should not miss this opportunity.

**Wall
Paper**

For Season 1905.

No previous collection has contained such attractive features as that we now ask you to call and examine; it is the cream of the celebrated product of the

Watson Foster Co., Ltd.,
Montreal.

We have bright, pretty florals and stripes for chambers; magnificent hall, dining-room, store, and office decorations; and a wide choice of very beautiful

Parlor Hangings

in soft shades of creams, greens, blues, etc., with silver and gilt treatment.

Altogether, our range outclasses any previous offerings in value and effect.

Our cheap papers are good and our good papers are cheap.

So if you have any walls not recently papered, let us show you how easy it will be to produce a beautiful result at comparatively small expense.

We have procured the services of Mr. A. Desilets, an expert at paper hanging, who will guarantee any work entrusted to him.

Leave your orders with us, and we will do the rest.

Don't forget that we are headquarters for all kinds of House Furnishings.
